

Scatter plot showing Predicted vs Observed values for the variable 'obs'. The x-axis is labeled 'Observed' and ranges from 0.0 to 0.8. The y-axis is labeled 'Predicted' and ranges from 0.0 to 0.8. A gray regression line is shown, and the coefficient of determination is  $R^2 = -0.057$ . The data points are colored blue and red, and shaped as circles and triangles. Most points are clustered near the origin, with a few outliers at higher predicted values.
